Educational goals and characteristics	The Prospective Fellow is a medical graduate who has completed or about to complete an approved Orthopaedic surgery training program. The applicant must have a strong commitment and clinical experience to Upper Limb Surgery, and an established record in undertaking research. The Fellow will perform clinical duties involved with the management of disorders of the hand and upper limb and would have a regular on call commitment at Flinders Medical Centre under the supervision of a hand surgeon. The Fellow would also assist the Hand and Upper Limb Surgeon in his private rooms and in private operating sessions, as well as attend regular academic meetings on disorders of the upper limb. The Fellow will be expected to perform clinical research throughout the twelve-month attachment and would have specific time allocated for this. Research could be performed in conjunction with hand therapists. Research protocols have been established and prospective data has been collected for future projects. Flinders Medical Centre is a teaching hospital associated with the Flinders University. Computerised data retrieval is readily accessible and facilities for preparation and presentation of papers are available.	
Requirements/ criteria	• Eligible for registration by the Medical Board of South Australia. • FRACS or equivalent • IELTS or equivalent • Keen interest in developing a subspecialty in upper limb orthopaedics • Previous performance of specific upper limb research would be seen as advantageous • Log book required as this program is targeted at an individual post fellowship
