

Fellowship in Joint Replacement and Reconstructive Surgery (SA0003)

Chief Supervisor: A/Prof Boopalan Ramasamy, MBBS, DOrtho, MS

Length of program: 12 Months, commencing 1 July

Institutions: Royal Adelaide Hospital
University of Adelaide

Stipend: AU\$ 88,335-AU\$143,777 Base salary + emergency on call

Educational Goals:

A clinical and research fellowship in joint replacement and revision surgery, arthritis surgery and adult reconstructive surgery is available for one year.

The Department of Orthopaedics and Trauma is the main teaching hospital of the University of Adelaide. The department has approximately 100 acute and elective beds and additional spinal and general rehabilitation beds. The department has implant analysis, bio-engineering, musculoskeletal and cell biology, as well as a clinical epidemiology centre, and access to small and large animal operating facilities. The department has a well-established undergraduate and postgraduate teaching program.

The fellow is employed in the position of lecturer by the University of Adelaide, with clinical commitments at the Royal Adelaide Hospital. The responsibilities include undertaking joint replacement and revision and reconstructive surgery, patient care and supervision of junior staff. The fellow will undertake and be involved in clinical and basic research and undertake part-time duties of a lecturer to undergraduate students. The fellowship offers training in all aspects of joint replacement surgery and participation in an active clinical service and research program.

Educational Qualifications/Requirements:

Completed Orthopaedic Fellowship Exam or equivalent

How to apply:

Applications, including a detailed curriculum vitae and the names of three referees with whom the applicant has worked, must be received by 30 July for the position commencing 1 July the following year.
