Length	Six (6) months	
Stipend	\$50,000	
Institutions	Joint Vision Orthopaedic Group - Private Practice, Wollongong Private Hospital, Wollongong Day Surgery, Wollongong Hospital (Public)	
Educational goals and characteristics	<p>This Fellowship aims to provide speciality training to an orthopaedic surgeon wishing to specialise in foot and ankle surgery. Upon completion, the Fellow should be proficient in surgical/non-surgical intervention and management of foot and ankle conditions in adults and children. Furthermore, the Fellow will gain an understanding of the key administrative requirements for a successful multidisciplinary orthopaedic clinic.</p> <p>The Fellowship is AOA accredited and offers significant exposure to multi-disciplinary care of complex foot and ankle conditions such as arthritis (including ankle replacement), diabetic foot and Charcot reconstruction, percutaneous forefoot, sports injuries, trauma, and deformity correction (including external ring fixation).</p> <p>The Fellow will work in outpatient clinics, surgical theatre, and academic research initiatives under the supervision of Dr Meghan Dares and Dr Sheraz Anjum while maintaining professional integrity with the Joint Vision multidisciplinary team and associated orthopaedic departments. The annual case load is more than 1500 patients. The Fellow will also be expected to make significant research contributions (e.g., draft publication or presentation) with time allocated for research engagement.</p>	
Requirements/ criteria	<p>The applicant will have finished general orthopaedic training and have competent basic foot and ankle surgical skills. They will have a desire to further explore a particular area in foot and ankle surgery.</p> <p>The applicant <u>must</u> be eligible for registration with the Medical Board of Australia (AHPRA) and have:</p> <ul style="list-style-type: none"> the required post graduate orthopaedic training and clinical experience appropriate to year(s) of training knowledge and experience in foot and ankle surgical techniques demonstrated high standard of clinical practice and professional integrity 	

	<ul style="list-style-type: none"> • demonstrated ability to work within a multidisciplinary team • demonstrated commitment to quality improvement/adaption to change • English language proficiency (International English Language Testing System; IELTS Academic Module or equivalent with pass of 7 in each component) • experience in scientific/clinical research and publication (desirable)
Additional Information	If not already held, applicants will apply for registration and accreditation as a medical practitioner in Australia. Non-Australian/New Zealand citizens will also need to obtain a Training Visa (407). A fee estimate for these requirements can be located on the Joint Vision website or requested via email.
How to Apply	Please email a cover letter, detailed CV, and current contact details for two (2) referees to fellowship@jointvision.com.au
