| Educational goals and characteristics | <p>The fellowship in shoulder surgery, arthroscopy and arthroplasty provides fellows with training and practical application in all aspects of shoulder surgery. Assessment and management of shoulder instability, cuff pathology, arthritis, stiffness and fractures will be covered.</p> <p>The fellowship allows and encourages opportunities for both clinical and basic science research. The fellowship is based at Princess Alexandra Hospital and various private hospitals. Private assisting opportunities are included.</p> <p>Research opportunities exist through the Fellowship's ties with the Brisbane Hand and Upper Limb Research Institute, the Queensland University of Technology (QUT) and the University of Queensland. There is also access to the biomechanics laboratory at QUT and an animal research facility.</p> | |
