Educational Goals and Characteristics	The successful candidate will obtain experience in the diagnosis and surgical management of most hip and knee conditions. They are expected to have at least a reasonable knowledge of hip and knee conditions, be able to take a history and formulate a management plan. The applicant is expected to be able to plan for surgeries, set up for surgery and be able to perform some or all of the surgeries performed. This includes hip and knee arthroscopies, ACL's and joint replacements. At Concord Public Hospital the applicant will be supervised but able to be the primary surgeon performing these procedures, depending on their level of experience. Dr Walker has a number of innovative techniques and inventions he is working on and you will be able to see how these are progressed from an engineering, patenting and practical point of view. The candidate will be involved in research and will prepare papers for presentations and publications. At Concord Hospital there is a weekly patient and x-ray presentation for learning purposes. There is always the ability to work with some other surgeons at Concord in both elective and emergency surgeries if you have spare time.	
Requirements/ Criteria	Completion of FRACS in Orthopaedics (or equivalent degree) is required. International applicants must have valid IELTS academic certificate, scoring a minimum of 7 competencies in each module.	
How to Apply	Please email Dr Peter Walker, office@drpeterwalker.com.au , together with a detailed CV, photo and 3 references, 12 months prior to the start of the fellowship.
