Institutions	Mater Hospital, Concord Hospital, Macquarie University Hospital, NSW	
Educational goals and characteristics	The reconstructive and arthroplasty surgery is of the hip and knee joints. The fellow will be involved in pre-operative evaluation and surgery in a large and busy joint replacement practice, with extensive experience in both primary and revision surgery of the hip and knee. About 20 percent of the work is revision surgery. The fellow will also be involved in post-operative management and long-term follow-up evaluation. Regular meetings include ward rounds and presentation at teaching rounds. Clinical research will be based on an extensive long-term surveillance database and applicants will be required to prepare papers for presentation and publication. There will also be opportunity to participate in bench-top research and experimentation.	
Requirements/ criteria	Qualified Orthopaedic Surgeon or within Two years of completion of training. Qualifications must be suitable for registration as a Medical Practitioner in NSW All candidates need to be competent in speaking, writing and understanding the English language. International candidates must have a valid IELTS certificate, scoring a minimum of 7 in each competency. Demonstrated clinical practice to a high standard. Capacity to work co-operatively with other staff and practitioners Permanent residency or eligibility for Occupational Trainee visa (overseas candidates)	
How to Apply	Applications to be sent to Lyn McDonald, together with a detailed curriculum vitae and 2 written references.
